

Machine Learning

Answers-

Q1- a

Q2- a

Q3- b

Q4- b

Q5- c

Q6- b

Q7- d

Q8- d

Q9- a

Q10- b

Q11- b

Q12- a,b,c

Q13- Regularization is the set of techniques or a method used in machine learning to increase the accuracy of prediction by balancing underfitting and overfitting of a model.

Q14- There are mainly two algorithms are used- (a)Lasso and (b) Ridge

One another method is – dropout

Q15- The error is the deviation of observed value from it's actual value .In Machine Learning ,our objective is to minimize this error.
